

iTunes

Step 1: Download iTunes

- Go to Apple.com and click the iTunes tab

- Then, scroll down and click Free Download

[Apple Customer Privacy Policy](#)

Email Address

- Now, type your email (optional) and press Download Now.

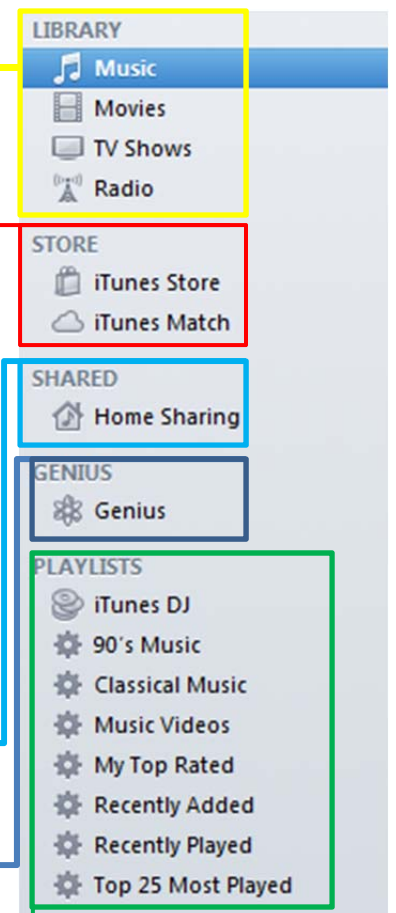

Once it is downloaded, open the application. There will be a toolbar on the left. In the Library tab, you can view all your music, movies, TV shows, and you can listen to the radio.

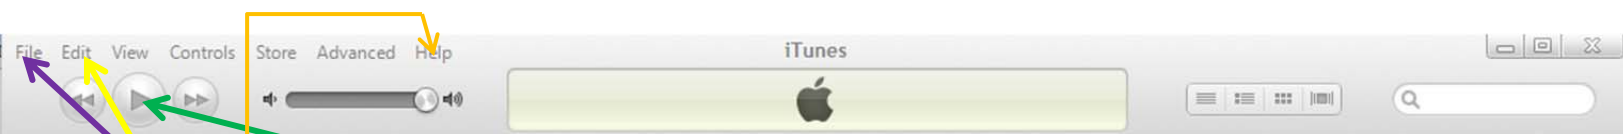

The store tab will let you buy albums, songs, music videos, apps, and more. The iTunes Match stores your library to iCloud.

Home Sharing is sharing your library with another device, for example if I had an iPod and I got a new iPhone, I could convert my library from my old iPod to my new iPhone.

Genius takes your songs from your library and matches them with similar songs.

Playlist shows you all your playlist you have made.

To play music, go to your songs and double click it. You can manage it here.

In the file tab, you can create a new playlist, add files and folders to your library, sync your device, and more.

To log into your Apple ID, click the store tab and click sign in.
